

Real World Data on ICI response in Non-Small Cell Lung Cancer

Patient Cohort

Indication: Advanced NSCLC

Treatment: 1st line immune checkpoint inhibitors

Geography: UK

~730

Patients

5

**Up to 5 years of
follow up**

Data Types

- Detailed clinical information with treatment outcomes and longitudinal follow up
- Baseline and follow-up CT scans
- Basic biomarker profiling

Diagnosis

- Baseline CT scan*
- Patient characteristics
- Clinical biomarkers
- Tumour staging & histology
- Treatment history

Treatment follow-up

- Follow-up CT scan*
- Treatment details
- Disease status
- Blood test results

Patient outcomes

- Date of progression
- Date of death
- Toxicity
- PROMs

Baseline

Treatment

Longitudinal follow-up

*Baseline CT scan in ~41% of patients, follow-up CT imaging in ~85% of patients.
